World Trade Systems of the East and West

Geoffrey C. Gunn 2017-11-13 In *World Trade Systems of the East and West*, Geoffrey C. Gunn profiles Nagasaki's historical role in mediating the Japanese bullion trade, especially silver exchanged against Chinese and Vietnamese silk.

Early Modern Southeast Asia, 1350-1800 Ooi Keat Gin 2015-10-08 This book presents extensive new research findings on and new thinking about Southeast Asia in this interesting, richly diverse, but much understudied period. It examines the wide and well-developed trading networks, explores the different kinds of regimes and the nature of power and security, considers urban growth, international relations and the beginnings of European involvement with the region, and discusses religious factors, in particular the spread and impact of Christianity. One key theme of the book is the consideration of how well-developed Southeast Asia was before the onset of European involvement, and, how, during the peak of the commercial boom in the 1500s and 1600s, many polities in Southeast Asia were not far behind Europe in terms of socio-economic progress and attainments.

Popular Controversies in World History [4 volumes] Steven L. Investigating History's Intriguing Questions offers uniquely compelling and educational examinations of pivotal events and puzzling phenomena, from the earliest evidence of human activity to controversial events of the 20th century. From the geographic location of human origins, to the authenticity of the Shroud of Turin, to the innocence—or guilt—of Sacco and Vanzetti, *Popular Controversies in World History: Investigating History's Intriguing Questions* provides four volumes on the ongoing debates that have captivated both the historical community and the public at large. In each chapter, established experts offer credible opposing arguments pertaining to specific debates, providing readers with resources for independent critical thinking on the issue. This format allows students, scholars, and other interested readers to actively engage in some of the most intriguing conundrums facing historians today.

A World at Sea Lauren Benton 2020-10-09 The past twenty-five years have brought a dramatic expansion of scholarship in maritime history, including new research on piracy, long-distance trade, and seafaring cultures. Yet maritime history still inhabits an isolated corner of world history, according to editors Lauren Benton and Nathan Perl-Rosenthal. Benton and Perl-Rosenthal urge historians to place the relationship between maritime and terrestrial processes at the center of the field and to analyze the links between global maritime

practices and major transformations in world history. *A World at Sea* consists of nine original essays that sharpen and expand our understanding of practices and processes across the land-sea divide and the way they influenced global change. The first section highlights the regulatory order of the seas as shaped by strategies of land-based polities and their agents and by conflicts at sea. The second section studies documentary practices that aggregated and conveyed information about sea voyages and encounters, and it traces the wide-ranging impact of the explosion of new information about the maritime world. Probing the political symbolism of the land-sea divide as a threshold of power, the last section features essays that examine the relationship between littoral geographies and sociolegal practices spanning land and sea. Maritime history, the contributors show, matters because the oceans were key sites of experimentation, innovation, and disruption that reflected and sparked wide-ranging global change. Contributors: Lauren Benton, Adam Clulow, Xing Hang, David Iglar, Jeppe Mulich, Lisa Norling, Nathan Perl-Rosenthal, Carla Rahn Phillips, Catherine Phipps, Matthew Raffety, Margaret Schotte.

Cambodia and the West, 1500-2000 T. O. Smith 2018-03-19 This volume brings together an interdisciplinary team of established and emerging scholars from the disciplines of history, political science and communication studies, to provide a historical reappraisal of Cambodia's relationships with the West. Contributors to the volume examine moments of historical import in Cambodia's history, from the sixteenth to the twenty-first century. These include Cambodia's first contacts with European mercantilism; the establishment of formal French colonialism and commercialism; British peace enforcement and diplomacy after the Second World War; independence, modernisation and the onset of the Cold War and the United Nations peace process; and the Khmer Rouge genocide tribunal of more recent times. The result is a unique and significant new

analysis of some of Cambodia's most controversial interactions with the West, demonstrating how far the West has shaped the development of Cambodia in the contemporary epoch.

Offshore Asia Fujita Kayoko 2013 This exemplary work of international collaboration takes a comparative approach to the histories of Northeast and Southeast Asia, with contributions from scholars from Japan, Korea and the Englishspeaking academic world. The new scholarship represented by this volume demonstrates that the vast and growing commercial interactions between the countries of eastern Asia have long historical roots. The so-called "opening" to Western trade in the mid-nineteenth century, which is typically seen as the beginning of this process, is shown to be rather the reversal of a relatively temporary phase of state consolidation in the long eighteenth century.

The Asian Mediterranean François Gipouloux 2011-01-01 This intensive monograph, *The Asian Mediterranean*, is a great synthesis of east west maritime worlds under an emerging global world. Professor Gipouloux has combined historical studies on global maritime seas with regional economic studies on Asia. He also integrates historical interaction between maritime seas and coastal port cities by creating the imaginative geo-economical concept of the East Asian economic corridor, running between Vladivostok and Singapore and locating China, Japan and Southeast Asia into this maritime area. To attain this goal, Professor Gipouloux globalises China through north south, east west and past present combinations, using cross-disciplinary approaches political economy, geography and international relations under wide historical perspectives. *The Asian Mediterranean* opens a new horizon to look into Asia from a global perspective and at the same time reminds us of the connection beyond contrast between East and West. Takeshi Hamashita, Tokyo University, Japan and Sun Yat-sen University, Guangzhou, China A fascinating analysis of the proposition that the start of the 21st century is witnessing the rapid rise in South East Asia of a new and powerful transnational economic zone, the Asian Mediterranean. It uses a wide range of historical and contemporary

multidisciplinary sources to systematically explore how, why, and in what ways we can better interpret and understand this contemporary version of economic globalisation by looking back to the equivalent processes centred on the ports around the Mediterranean and the Baltic seas during the late 16th century. Peter Daniels, University of Birmingham, UK

François Gipouloux has written a vast and comprehensive history of the Asian economic system. In the tradition of Braudel, he paints a picture that is detailed, full of insight, and essentially very long term. On the basis of an analysis of the old Mediterranean and Hanseatic economic networks, he surveys the pre-modern Asian system, bringing it up to date with studies of Yokohama, Hong Kong, Singapore and other Asian hubs. The culmination of many years work, Gipouloux throws light on a new China a China no longer land based and inward looking but dependent on, and a power in, a maritime world. Christopher Howe, University of London, UK

Gipouloux's ground-breaking study based on a long career as a scholar of Asia's past is a most original contribution to the study of globalization. Connecting past and present, the author has further developed the somewhat vague metaphor of an Asian Mediterranean into a well-defined concept that can also be applied to analyzing contemporary affairs. While in the past the traditional Chinese and Japanese state systems were failing to formulate adequate answers, on a more informal level the port cities were able to meet with the maritime challenges of the emerging modern world system. The author convincingly shows how also in the age of globalization, a string of coastal metropolises continues to be instrumental in opening up the Far Eastern economy to the global economy. Leonard Blussé, Leiden University, The Netherlands

This insightful book draws upon a wide range of disciplines political economy, geography and international relations to examine how Asia has returned to its central position in the world economy. As in the case of the hosting of the Olympic games, it is cities rather than states which compete, whether as financial centres, logistical hubs or platforms for coordinating international subcontracting. Analysing the historical precedents of the Mediterranean maritime republics, the Baltic

Sea Hanseatic League and the South China Sea mercantile kingdoms, the book delineates the way stable economic and legal institutions were developed largely beyond the purview of, and at times in conflict with, the State. Discussing the strong link between history and contemporary economic situation, The Asian Mediterranean will appeal to academics, including

The Oxford History of Historical Writing Axel Schneider 2011-05-05 The fifth volume of The Oxford History of Historical Writing offers essays by leading scholars on the writing of history globally since 1945. Divided into two parts, part one selects and surveys theoretical and interdisciplinary approaches to history, and part two examines select national and regional historiographies throughout the world. It aims at once to provide an authoritative survey of the field and to provoke cross-cultural comparisons. This is chronologically the last of five volumes in a series that explores representations of the past across the globe from the beginning of writing to the present day.

A Brief History of Vietnam Bill Hayton 2022-10-25 A comprehensive guide to understanding Vietnam's long and tumultuous history A Brief History of Vietnam explores the turbulent history of a land that has risen from the ashes of war to become the newest Asian tiger economy. This book expertly examines the history of a people and a nation with ancient roots which only took its current shape in the 19th century under French colonial rule, and its current name in 1945. Before that, Vietnam was known by many names, under many rulers. Located in the geographic center of Southeast Asia, the country we call "Vietnam" was ruled by China, then by a series of Vietnamese emperors, and by the French. A devastating, decades-long conflict for independence ensued, ending with the conclusion of the Vietnam War in 1975. Key topics discussed in this fascinating book include: China's ancient conquest of Vietnam and the millennia-long struggle of the Vietnamese for independence from their powerful neighbor to the north The reign of the Nguyen dynasty, the last dynasty to rule Vietnam, with its capital at the ancient city of Hue, today a UNESCO World Heritage Site The story of Ho Chi Minh, educated in France, who attended the Treaty of Versailles to advocate for independence and

became Vietnam's first president after the French were defeated. The country's miraculous emergence from three decades of war and how it has embarked on the path to becoming one of the world's fastest-growing economies today. Journalist Bill Hayton's accessible prose makes *A Brief History of Vietnam* an essential study of a complex culture at the heart of Southeast Asia--and the roots of its current economic dynamism.

Việt Nam Ben Kiernan 2017 This comprehensive work traces Viet Nam's history, a narrative of a multi-ethnic, multi-religious heritage, from ancient chiefdoms to imperial provinces, from independent kingdoms to contending regions, civil wars, French colonies, and modern republics. This book narrates the history of the different peoples who have lived in the three major regions of Viet Nam over the past 3,000 years. It brings to life their relationships with these regions' landscapes, water resources, and climatic conditions, their changing cultures and religious traditions, and their interactions with their neighbors in China and Southeast Asia. Key themes include the dramatic impact of changing weather patterns from ancient to medieval and modern times, the central importance of riverine and maritime communications, ecological and economic transformations, and linguistic and literary changes. The country's long experience of regional diversity, multi-ethnic populations, and a multi-religious heritage that ranges from local spirit cults to the influences of Buddhism, Confucianism and Catholicism, makes for a vividly pluralistic narrative. The arcs of Vietnamese history include the rise and fall of different political formations, from chiefdoms to Chinese provinces, from independent kingdoms to divided regions, civil wars, French colonies, and modern republics. In the twentieth century anticolonial nationalism, the worldwide depression, Japanese occupation, a French attempt at reconquest, the traumatic American-Vietnamese war, and the 1975 communist victory all set the scene for the making of contemporary Viet Nam. Rapid economic growth in recent decades has transformed this one-party state into a global trading nation. Yet its rich history still casts a long shadow. Along with other members of the Association of Southeast Asian Nations, Viet Nam is now involved in a tense territorial standoff in the South China Sea,

as a rival of China and a " of the United States. If its independence and future geographical unity seem assured, Viet Nam's regional security and prospects for democracy remain clouded.

A History of Early Modern Southeast Asia, 1400-1830 Barbara Watson Andaya 2015-02-19 Written by two experienced teachers with a long history of research, this textbook provides students with a detailed overview of developments in early modern Southeast Asia, when the region became tightly integrated into the world economy because of international demand for its unique forest and sea products. Proceeding chronologically, each chapter covers a specific time frame in which Southeast Asia is located in a global context. A discussion of general features that distinguish the period under discussion is followed by a detailed account of the various sub-regions. Students will be shown the ways in which local societies adapted to new religious and political ideas and responded to far-reaching economic changes. Particular attention is given to lesser-known societies that inhabited the seas, the forests, and the uplands, and to the role of the geographical environment in shaping the region's history. The authoritative yet accessible narrative features maps, illustrations, and timelines to support student learning. A major contribution to the field, this text is essential reading for students and specialists in Asian studies and early modern world history.

The Cambridge History of China: Volume 9, The Ch'ing Dynasty to 1800, Part 2 Willard J. Peterson 2016-04-07 Volume 9, Part 2 of *The Cambridge History of China* is the second of two volumes which together explore the political, social and economic developments of the Ch'ing Empire during the seventeenth and eighteenth centuries prior to the arrival of Western military power. Across fifteen chapters, a team of leading historians explore how the eighteenth century's greatest contiguous empire in terms of geographical size, population, wealth, cultural production, political order and military domination peaked and then began to unravel. The book sheds new light on the changing systems deployed under the Ch'ing dynasty to govern its large, multi-ethnic Empire and surveys the dynasty's complex relations with neighbouring states and Europe. In this

compelling and authoritative account of a significant era of early modern Chinese history, the volume illustrates the ever-changing nature of the Ch'ing Empire, and provides context for the unforeseeable challenges that the nineteenth century would bring.

War, Trade and Piracy in the China Seas (1622-1683) Weichung Cheng 2013-05-13 The fall of the Ming allowed Cheng Ch'eng-kung—alias Coxinga—and his sons to create a short-lived but independent seaborne regime in China's southeastern coastal provinces that competed fiercely, if only briefly, with Spanish, Portuguese, Dutch and English merchants during the early stages of globalization.

New Perspectives on the History and Historiography of Southeast Asia Michael Arthur Aung-Thwin 2011-05-13 Using a unique "old-new" treatment, this book presents new perspectives on several important topics in Southeast Asian history and historiography. Based on original, primary research, it reinterprets and revises several long-held conventional views in the field, covering the period from the "classical" age to the twentieth century. Chapters share the approach to Southeast Asian history and historiography: namely, giving "agency" to Southeast Asia in all research, analysis, writing, and interpretation. The book honours John K. Whitmore, a senior historian in the field of Southeast Asian history today, by demonstrating the scope and breadth of the scholar's influence on two generations of historians trained in the West. In addition to providing new information and insights on the field of Southeast Asia, this book stimulates new debate on conventional ideas, evidence, and approaches to its teaching, research, and understanding. It addresses, and in many cases, revises specific, critically important topics in Southeast Asian history on which much conventional knowledge of Southeast Asia has long been based. It is of interest to scholars of Southeast Asian Studies, as well as Asian History.

China and Maritime Europe, 1500-1800 John E. Wills, Jr 2010-12-31 *China and Maritime Europe, 1500-1800* looks at early modern China in some of its most complicated and intriguing relations with a world of increasing global interconnection. New World silver, Chinese tea,

Jesuit astronomers at the Chinese court, and merchants and marauders of all kinds play important roles here. Although pieces of these stories have been told before, these chapters provide the fullest and clearest available summaries, based on sources in Chinese and in European languages, making this information accessible to students and scholars interested in the growing connections among continents and civilizations in the early modern period.

In Asian Waters Eric Tagliacozzo 2022-07-19 A sweeping account of how the sea routes of Asia have transformed a vast expanse of the globe over the past five hundred years, powerfully shaping the modern world In the centuries leading up to our own, the volume of traffic across Asian sea routes—an area stretching from East Africa and the Middle East to Japan—grew dramatically, eventually making them the busiest in the world. The result was a massive circulation of people, commodities, religion, culture, technology, and ideas. In this book, Eric Tagliacozzo chronicles how the seas and oceans of Asia have shaped the history of the largest continent for the past half millennium, leaving an indelible mark on the modern world in the process. Paying special attention to migration, trade, the environment, and cities, *In Asian Waters* examines the long history of contact between China and East Africa, the spread of Hinduism and Buddhism across the Bay of Bengal, and the intertwined histories of Islam and Christianity in the Philippines. The book illustrates how India became central to the spice trade, how the Indian Ocean became a "British lake" between the seventeenth and nineteenth centuries, and how lighthouses and sea mapping played important roles in imperialism. The volume ends by asking what may happen if China comes to rule the waves of Asia, as Britain once did. A novel account showing how Asian history can be seen as a whole when seen from the water, *In Asian Waters* presents a voyage into a past that is still alive in the present.

Sea Rovers, Silver, and Samurai Tonio Andrade 2016-03-31 *Sea Rovers, Silver, and Samurai* traces the roots of modern global East Asia by focusing on the fascinating history of its seaways. The East Asian maritime realm, from the Straits of Malacca to the Sea of Japan, has been a core region of international trade for

millennia, but during the long seventeenth century (1550 to 1700), the velocity and scale of commerce increased dramatically. Chinese, Japanese, and Vietnamese smugglers and pirates forged autonomous networks and maritime polities; they competed and cooperated with one another and with powerful political and economic units, such as the Manchu Qing, Tokugawa Japan, the Portuguese and Spanish crowns, and the Dutch East India Company. Maritime East Asia was a contested and contradictory place, subject to multiple legal, political, and religious jurisdictions, and a dizzying diversity of cultures and ethnicities, with dozens of major languages and countless dialects. Informal networks based on kinship ties or patron-client relations coexisted uneasily with formal governmental structures and bureaucratized merchant organizations. Subsistence-based trade and plunder by destitute fishermen complemented the grand dreams of sea-lords, profit-maximizing entrepreneurs, and imperial contenders. Despite their shifting identities, East Asia's mariners sought to anchor their activities to stable legitimacies and diplomatic traditions found outside the system, but outsiders, even those armed with the latest military technology, could never fully impose their values or plans on these often mercurial agents. With its multilateral perspective of a world in flux, this volume offers fresh, wide-ranging narratives of the "rise of the West" or "the Great Divergence." European mariners, who have often been considered catalysts of globalization, were certainly not the most important actors in East and Southeast Asia. China's maritime traders carried more in volume and value than any other nation, and the China Seas were key to forging the connections of early globalization—as significant as the Atlantic World and the Indian Ocean basin. Today, as a resurgent China begins to assert its status as a maritime power, it is important to understand the deep history of maritime East Asia.

A Vietnamese Moses George E. Dutton 2017 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. A Vietnamese Moses is the story of Philiphê Binh, a

Vietnamese Catholic priest who in 1796 traveled from Tonkin to the Portuguese court in Lisbon to persuade its ruler to appoint a bishop for his community of ex-Jesuits. Based on Binh's surviving writings from his thirty-seven-year exile in Portugal, this book examines how the intersections of global and local Roman Catholic geographies shaped the lives of Vietnamese Christians in the early modern era. The book also argues that Binh's mission to Portugal and his intense lobbying on behalf of his community reflected the agency of Vietnamese Catholics, who vigorously engaged with church politics in defense of their distinctive Portuguese-Catholic heritage. George E. Dutton demonstrates the ways in which Catholic beliefs, histories, and genealogies transformed how Vietnamese thought about themselves and their place in the world. This sophisticated exploration of Vietnamese engagement with both the Catholic Church and Napoleonic Europe provides a unique perspective on the complex history of early Vietnamese Christianity.

In the Shadow of the Company: The Dutch East India Company and Its Servants in the Period of Its Decline (1740-1796) Chris Nierstrasz 2012-08-27 Chris Nierstrasz' *In the Shadow of the Company*, offers us an insight into the relation between the Dutch East India Company and its servants as it slipped into decline. This relationship altered dramatically in the eighteenth century under internal and external pressures.

France and Germany in the South China Sea, c. 1840-1930 Bert Becker 2021-07-02 This book explores imperial power and the transnational encounters of shipowners and merchants in the South China Sea from 1840 to 1930. With British Hong Kong and French Indochina on its northern and western shores, the 'Asian Mediterranean' was for almost a century a crucible of power and an axis of economic struggle for coastal shipping companies from various nations. Merchant steamers shipped cargoes and passengers between ports of the region. Hong Kong, the global port city, and the colonial ports of Saigon and Haiphong developed into major hubs for the flow of goods and people, while Guangzhouwan survived as an almost forgotten outpost of Indochina. While previous research in this field has largely remained within

the confines of colonial history, this book uses the examples of French and German companies operating in the South China Sea to demonstrate the extent to which transnational actors and business networks interacted with imperial power and the process of globalisation.

Familial Properties Nhung Tuyet Tran

2018-05-31 *Familial Properties* is the first full-length history of Vietnamese gender relations in the precolonial period. Author Nhung Tuyet Tran shows how, despite the bias in law and practice of a patrilineal society based on primogeniture, some women were able to manipulate the system to their own advantage. Women succeeded in taking pragmatic advantage of socioeconomic turmoil during a time of war and chaos to acquire wealth and, to some extent, control what happened to their property. Drawing from legal, literary, and religious sources written in the demotic script, classical Chinese, and European languages, Tran argues that beginning in the fifteenth century, state and local communities produced laws and morality codes limiting women's participation in social life. Then in the seventeenth and eighteenth centuries, economic and political turmoil led the three competing states—the Mac, Trinh, and Nguyen—to increase their military service demands, producing labor shortages in the fields and markets of the countryside. Women filled the vacuum left by their brothers, husbands, and fathers, and as they worked the lands and tended the markets, they accumulated monetary capital. To protect that capital, they circumvented local practice and state law guaranteeing patrilineal inheritance rights by soliciting the cooperation of male leaders. In exchange for monetary and landed donations to the local community, these women were elected to become spiritual patrons of the community whose souls would be forever preserved by collective offering. By tracing how the women, local leaders, and court elites negotiated gender models to demarcate their authority, Tran demonstrates that despite the Confucian ethos of the times, survival strategies were able to subvert gender norms and create new cultural models. Gender, thus, as a signifier of power relations, was central to the relationship between state and local communities in early modern Vietnam. Rich and detailed in its use of documentary evidence from

a range of archives, this work will be of great interest to scholars of Southeast Asian history and the comparative study of gender.

A History of the Vietnamese K. W. Taylor

2013-05-09 A groundbreaking, comprehensive history of Vietnam from the earliest times to the present day.

Rogues Gallery Matthew Blackman 2021-03-15

If you reckon corruption in South Africa began with Zuma or even with apartheid, it's time to catch a wake-up call. *Rogues' Gallery* tells the story of some of the biggest skelms to grace our (un)fair shores, showing that dodgy dealings have been a national pastime for as long as South African history has been written down. The action starts with the machinations of three colonial governors: rotten Willem Adriaan van der Stel and the 'twaddling' British duo, Sir George Yonge and Lord Charles Somerset. Added to this is Cecil John Rhodes's unparalleled success in poisoning the land with theft, fraud and war, and Oom Paul Kruger's corrupt and compromised Volksraads (official and unofficial). Readers are then treated to apartheid's finest feats in corruption: from the Broederbond's perfect ten in state capture to the Department of Information's peddling of fake news and the apartheid state's manufacture of - no, not illegal cigarettes - Class A drugs! And let's not forget the hotbed of corruption that was the 'independent' homelands. Add to this a few murders, plenty of nepotism and a state president who started out as a Nazi spy, and the gallery of rogues is complete. On the flipside, every chapter also features at least one brave whistle-blower - the true heroes of this book. Irreverent, entertaining and impeccably researched, *Rogues' Gallery* busts the myth that the Zuptas were the first to capture the South African state, showing that corruption has always been around - and that the tricks politicians play haven't changed a jot.

Textiles and Clothing of Việt Nam Michael C.

Howard 2016-08-03 Việt Nam is the home of more than fifty ethnic minorities--such as the Cham and Thai--many of which have distinctive clothing and weaving traditions linked to antiquity. The tight-fitting tunic called ao dai, widely recognized as a national symbol, has its roots in the country's 2,000-year history of textiles. Beginning with silk production in the

Bronze Age cultures of the Red River, this book covers textiles in Việt Nam--including bark-cloth, kapok and hemp--through the centuries of Chinese rule in the north, a number of independent feudal societies and the brief period of French colonial rule.

Imagining Asia(s) Andrea Acri 2019-10-23 As a continent lying to the east of Europe, Asia has been malleable to different spatial and temporal imaginations and politics. Recent scholarship has highlighted how the seemingly self-contained regional configurations of West and Central Asia, South and Southeast Asia, and East Asia carved by the Area Studies paradigm reflect changing (geo)political and economic interests than historical or cultural roots. This volume advances the question as to what Asia is, and as to whether there existed one or many Asia(s). It seeks to explore Asian societies as interconnected formations through trajectories/networks of circulation of people, ideas, and objects in the *longue durée*. Moving beyond the divides of Area Studies scholarship and the arbitrary borders set by late colonial empires and the rise of post-colonial nation-states, this volume maps critically the configuration of contact zones in which mobile bodies, minds, and cultures interact to foster new images, identities, and imaginations of Asia.

The Oxford History of Historical Writing Daniel Woolf 2011-05-05 A chronological scholarly survey of the history of historical writing in five volumes. Each volume covers a particular period of time, from the beginning of writing to the present day, and from all over the world.

Linking Destinies Peter Boomgaard 2008-01-01 Trade flows, cities and kinship relations can all be seen as elements of complex networks. In this collection of essays, all of which deal with Asia, we argue that there are good reasons to envisage them as various dimensions of the same networks.

An Object of Seduction Xiaolin Duan 2022-02-07 *An Object of Seduction* explores the early modern trans-Pacific export of Chinese silk to New Spain. It argues that the increasing demand for silk contributed to the parallel development of silk fashion and sericulture in China and New Spain, and also created conflicts on imperial regulations about foreign trade and hierarchical systems.

Merchant Cultures 2022-01-31 The way merchants trade, think about business and represent commerce in art forms define merchant culture. The world between 1500 and 1800 encompassed different merchant cultures that stood alone and in contact with others. Culture, power relations and institutions framed similarities and differences and outlined the global outcome of these exchanges.

Visible Cities Leonard BLUSSE 2009-06-30 The 1700s saw the rise of the China market and some notable changes to global consumption patterns. This book explores the economic and cultural transformations in East Asia through three key cities - Canton, a major trading city, Nagasaki, official port of Tokugawa Japan, and Batavia, link between the Indian Ocean and China seas.

The Tongking Gulf Through History Nola Cooke 2011-05-25 Since 2005, a series of significant developments has been unfolding in the area of the Tongking Gulf under the rubric of an ambitious project called "Two Corridors and One Rim." Proposed by Vietnam in 2004 and enthusiastically embraced by China, the project is designed to link their shared shores and hinterlands by superhighways and high-speed rail. An area that had seemed a backwater for two hundred years has suddenly become a dynamic engine of growth. Yet how innovative are these developments? Drawing on fresh historical insights and recent archaeological research in northern Vietnam and southern China, *The Tongking Gulf Through History* reveals that this region has long been a center of cultural, political, and economic exchange. From a historical point of view, contributors argue, the Gulf of Tongking has come full circle. Inspired by the Braudelian vision that regionality arises from long-term human interactions, essays avoid state-centered approaches of nationalist histories to focus on local communities throughout the Gulf. In doing so, they reveal a complex pattern of interrelationships and geopolitical factors that has shaped the gulf region for over two millennia. The first half of the volume covers the era from the Neolithic to the tenth century, when an independent state emerged from old Chinese Jiaozhi, or modern northern Vietnam; the second surveys the nine centuries that followed, in which only two states

The Social World of Batavia Jean Gelman Taylor 2009-04-22 In the seventeenth century, the Dutch established a trading base at the Indonesian site of Jakarta. What began as a minor colonial outpost under the name Batavia would become, over the next three centuries, the flourishing economic and political nucleus of the Dutch Asian Empire. In this pioneering study, Jean Gelman Taylor offers a comprehensive analysis of Batavia's extraordinary social world—its marriage patterns, religious and social organizations, economic interests, and sexual roles. With an emphasis on the urban ruling elite, she argues that Europeans and Asians alike were profoundly altered by their merging, resulting in a distinctive hybrid, Indo-Dutch culture. Original in its focus on gender and use of varied sources—travelers' accounts, newspapers, legal codes, genealogical data, photograph albums, paintings, and ceramics—*The Social World of Batavia*, first published in 1983, forged new paths in the study of colonial society. In this second edition, Gelman offers a new preface as well as an additional chapter tracing the development of these themes by a new generation of scholars.

Changing Dynamics and Mechanisms of Maritime Asia in Comparative Perspectives Shigeru Akita 2021-09-27 This book attempts to reveal historical dynamism of transforming contemporary Maritime Asia and to identify key driving forces or agencies for the evolution and transformation of Maritime Asia in the context of global history studies. It seeks to accomplish these goals by connecting different experiences in Maritime Asia both historically from the late early-modern to the present and spatially covering both East and Southeast Asia. Focusing on interactions on and through oceans, seas, and islands, Maritime Asia can deal with any aspects of human society and the nature, including diplomacy, maritime trade, cultural exchange, identity and others. Its interest in supra-regional interactions and networks, migration and diaspora, combined with its microscopic concern with local and trans-border affairs, will surely contribute to the common task of contemporary social sciences and humanities, to relativize the conventional framework based on the nation-state. In this regard, research in Maritime Asia claims to be an integral part of global studies.

Part I deals with long-distance trade and diplomatic relations during the late early modern era and its transition to the modern era, mainly in the nineteenth century. Part II focuses on the emergence of transregional and trans-oceanic Asian networks and the original institution-building efforts in the Asia-Pacific region in the twentieth century.
