A to Z of Chemists, Updated Edition
Elizabeth Oakes 2019-10-01 A to Z of Chemists, Updated Edition tells the stories of nearly 100 chemists—both well-known scientific greats of history and contemporary scientists whose work is just verging on greatness. Readers will find fascinating entries on people such as Gertrude Belle Elion, who developed drugs to cure diseases as diverse as leukemia, gout, herpes, malaria, and arthritis. From famous mainstream chemists to minority scientists often excluded from similar titles, A to Z of Chemists, Updated Edition spans all cultures, ethnicities, and eras. Designed for high school through early college students, this title in the Notable Scientists series is also an ideal resource for all readers interested in chemistry. Articulated in everyday language, even the most complex concepts are accessible. While the majority of the scientists in this work are, first and foremost, chemists, there is a handful of physicists, biologists, and other scientists who made significant contributions to chemistry. People covered include: Robert Wilhelm Bunsen (1811-1899) Louis Pasteur (1822-1895) George Washington Carver (1864-1943) St. Elmo Brady (1884-1966) Karl Ziegler (1898-1973) Percy Lavon Julian

(1899-1975) Linus Carl Pauling (1901-1994) Dorothy Crowfoot Hodgkin (1910-1994) Robert Burns Woodward (1917-1979) Sir George Porter (1920-2002) Sir Aaron Klug (1926-2018) Jean-Pierre Sauvage (1944-present) Aziz Sancar (1946-present) Ahmed Zewail (1946-2016) Venkatraman Ramakrishnan (1952-present)

Annual Report of the Ohio State Academy of Science Ohio Academy of Science 1903

Library Journal 2004 Includes, beginning Sept. 15, 1954 (and on the 15th of each month, Sept.-May) a special section: School library journal, ISSN 0000-0035, (called Junior libraries, 1954-May 1961). Also issued separately.

Literary Illumination Richard Leahy 2018-08-15 An Original Research Area - Little has been written on the connections between artificial light and literature in this period. Substantial Textual Coverage - A wide range of literature is analysed in this manuscript, which makes it beneficial to new or experienced scholars. Some more canonical texts are studied, and some more obscure authors and texts. The Holistic Approach - This manuscript tackles the entire history of nineteenth century illumination; it is an excellent primer for those interested in the field, and an example of what can be done within it.

American Reference Books Annual Bohdan S. Wynar 2005 1970- issued in 2 vols.: v. 1, General reference, social sciences, history, economics, business; v. 2, Fine arts, humanities, science and engineering.

Industrialization in the Modern World [2 volumes] John Hinshaw 2013-11-12 This unique

two-volume work analyzes the Industrial Revolution from a global perspective and traces its influences up to the present day—encouraging students to rethink the significance of events past and present. By taking a fresh approach to its topic, *Industrialization in the Modern World: From the Industrial Revolution to the Internet* enables students to see this ongoing phenomenon not as a standalone event, but as a catalyst for the formation of today's globalized, industrializing world. Spanning the period from 1750 to the present, the work offers some 450 entries that cover developments in Africa and Asia, as well as in Europe and the United States. Numerous essays are organized around specific questions or problems; others examine significant events, countries, or industries. The work deals with all the major aspects of traditional industrialization (textiles, coal, steel), as well as modern variations (China, computers, the Internet). With a targeted approach, the authors will help students see how industrialization in one society influenced another, how industrialization spread throughout the world, and the causes and effects of each country's individual "revolution."
