A Smaller History of Greece William Smith
2008-12-01 Sir William Smith (1813-1893) was an English lexicographer. He was originally destined for a theological career, but instead was articled to a solicitor. He was entered at Gray's Inn in 1830, but gave up his legal studies for a post at University College School, and began to write on classical subjects. His first attempt was the Dictionary of Greek and Roman Antiquities, which appeared in 1842. In 1849 followed the Dictionary of Greek and Roman Biography and Mythology, the Dictionary of Greek and Roman Geography in 1857. In 1850 he published the first of the school dictionaries; and in 1853 he began the Principia series, which marked a distinct step in the school teaching of Greek and Latin. Then came the Students' Manuals of History and Literature, in which the Greek history was the editor's own work. The most important, perhaps, of the books edited by Smith were those that dealt with ecclesiastical subjects. These were the Dictionary of the Bible

(1860-1865); the Dictionary of Christian Antiquities (1875- 1880), undertaken in collaboration with Archdeacon Samuel Cheetham; and the Dictionary of Christian Biography (1877-1887), jointly with Dr. Henry Wace.

There are only two species "known; both inhabit the continent and islands of India "--so that the mention of the peacock seems to exclude the possibility of the voyage having been to Africa. Mr. Crawford, indeed, in his excellent Detricpiivc Diutionary of the /n.ii(tn Islands, p. 310, expresses an opinion that the birds are more likely to have been parrots than peacocks; and he objects to the peacock, that, independent of its great size, it is of delicate constitution, which would make it nearly impossible to convey it in small vessels and by a long sea voyage. It is proper, however, to mention, on the authority of Mr. Gould, whose splendid works on birds are so well known, that the peacock is by no means a bird of delicate constitution, and that it would bear a sea voyage very well. Mr. Gould observes that it might be easily fed during long voyage, as it lives on

grain; and that it would merely have been necessary, in order to keep it in a cage, to have cut off its train; which, it is to be observed, falls off of itself, and is naturally renewed once a year. The inference to be drawn from the importation of peacocks is confirmed by the Hebrew name for the ape and the peacock. Neither of these name is of Hebrew, or even Shemitic origin; and each point to India.⁶ Thus the Hebrew word for ape is *It* is only to I *oddexi*, that there are not sufficient data for determining what were the ports in India or the Indian islands which were reached by the fleet of Hiram and Solomon. Sir Emerson Tennent has made a suggestion of *Ak'II tie* (*jtUr*, in *Ce*; *Ion*, on the ground that from three centuries before the Christian era there is one unbroken chain of evidence down to the present...
