Reading Stephen King Brenda Miller Power 1997 This collection of essays grew out of the "Reading Stephen King Conference" held at the University of Maine in 1996. Stephen King's books have become a lightning rod for the tensions around issues of including "mass market" popular literature in middle and high school English classes and of who chooses what students read. King's fiction is among the most popular of "pop" literature, and among the most controversial. These essays spotlight the ways in which King's work intersects with the themes of the literary canon and its construction and maintenance, censorship in public schools, and

the need for adolescent readers to be able to choose books in school reading programs. The essays and their authors are: (1) "Reading Stephen King: An Ethnography of an Event" (Brenda Miller Power); (2) "I Want to Be Typhoid Stevie" (Stephen King); (3) "King and Controversy in Classrooms: A Conversation between Teachers and Students" (Kelly Chandler and others); (4) "Of Cornflakes, Hot Dogs, Cabbages, and King" (Jeffrey D. Wilhelm); (5) "The 'Wanna Read' Workshop: Reading for Love" (Kimberly Hill Campbell); (6) "When 'IT' Comes to the Classroom" (Ruth Shagoury Hubbard); (7) "If Students Own Their Learning, What Do Teachers Do?" (Curt Dudley-Marling); (8) "Disrupting Stephen King: Engaging in Alternative Reading Practices" (James Albright and Roberta F. Hammett); (9) "Because Stories Matter: Authorial Reading and the Threat of Censorship" (Michael W. Smith); (10) "Canon Construction Ahead" (Kelly Chandler); (11) "King in the Classroom" (Michael R. Collings); (12) "King's Works and the At-Risk Student: The Broad-Based Appeal of a Canon Basher" (John Skretta); (13) "Reading the Cool Stuff: Students Respond to 'Pet Sematary'" (Mark A. Fabrizi); (14) "When Reading Horror Subliterature Isn't So Horrible" (Janice V. Kristo and Rosemary A. Bamford); (15) "One Book Can Hurt You...But a Thousand Never Will" (Janet S. People and Wildlife, Conflict Or Co-existence? Rosie Woodroffe 2005-08-25 Human-wildlife conflict is a major issue in conservation. As people encroach into natural habitats, and as conservation efforts restore wildlife to areas where they may have been absent for generations, contact between people and wild animals is growing. Some species, even the beautiful and endangered, can have serious impacts on human lives and livelihoods. Tigers kill people, elephants destroy crops and African wild dogs devastate sheep herds left unattended. Historically, people have responded to these threats by killing wildlife wherever possible, and this has led to the endangerment of many species that are difficult neighbours. The urgent need to conserve such species, however, demands coexistence of people and endangered wildlife. This book presents a variety of solutions to human-wildlife conflicts, including novel and traditional farming practices, offsetting the costs of wildlife damage through hunting and tourism, and the development of local and national policies.

An Indomitable Beast Alan Rabinowitz 2015-08-04 The jaguar is one of the most mysterious and least-known big cats of the world. The largest cat in the Americas, it has survived an onslaught of environmental and human threats partly because of an evolutionary history unique among wild felines, but also because of a power and indomitable spirit so strong, the jaguar has shaped indigenous cultures and the beliefs of early civilizations on two continents. In *An Indomitable Beast: The Remarkable Journey of the Jaguar*, big-cat expert Alan Rabinowitz shares his own personal journey to conserve a species that, despite its past resilience, is now on a slide toward extinction if

something is not done to preserve the pathways it prowls through an ever-changing, ever-shifting landscape dominated by humans. Rabinowitz reveals how he learned from newly available genetic data that the jaguar was a single species connected genetically throughout its entire range from Mexico to Argentina, making it unique among all other large carnivores in the world. In a mix of personal discovery and scientific inquiry, he sweeps his readers deep into the realm of the jaguar, offering fascinating accounts from the field. Enhanced with maps, tables, and color plates, *An Indomitable Beast* brings important new research to life for scientists, anthropologists, and animal lovers alike. This book is not only about jaguars, but also about tenacity and survival. From the jaguar we can learn better strategies for saving other species and also how to save ourselves when faced with immediate and long-term catastrophic changes to our environment.

Water is for Fighting Over John Fleck 2016-09 "Illuminating." --New York Times WIREd's

Required Science Reading 2016 When we think of water in the West, we think of conflict and crisis. Yet despite decades of headlines warning of mega-droughts, the death of agriculture, and the collapse of cities, the Colorado River basin has thrived in the face of water scarcity. John Fleck shows how western communities, whether farmers and city-dwellers or U.S.

environmentalists and Mexican water managers, actually have a promising record of conservation and cooperation. Rather than perpetuate the myth "Whiskey's for drinkin', water's for fightin' over," Fleck urges readers to embrace a new, more optimistic narrative--a future where the Colorado continues to flow.

Life in the Valley of Death Alan Rabinowitz 2010-08-30 Dubbed the Indiana Jones of wildlife science by The New York Times, Alan

Rabinowitz has devoted—and risked—his life to protect nature’s great endangered mammals. He has journeyed to the remote corners of the earth in search of wild things, weathering treacherous terrain, plane crashes, and hostile governments. *Life in the Valley of Death* recounts his most ambitious and dangerous adventure yet: the creation of the world’s largest tiger preserve. The tale is set in the lush Hukaung Valley of Myanmar, formerly known as Burma. An escape route for refugees fleeing the Japanese army during World War II, this rugged stretch of land claimed the lives of thousands of children, women, and soldiers. Today it is home to one of the largest tiger populations outside of India—a population threatened by rampant poaching and the recent encroachment of gold prospectors. To save the remaining tigers, Rabinowitz must navigate not only an unforgiving landscape, but the tangled web of politics in Myanmar. Faced with a military dictatorship, an insurgent army, tribes once infamous for taking the heads of their enemies, and villagers living on less than one U.S. dollar per day, the scientist and adventurer most comfortable with animals is thrust into a diplomatic minefield. As he works to balance the interests of disparate factions and endangered wildlife, his own life is threatened by an incurable disease. The resulting story is one of destruction and loss, but also renewal. In forests reviled as the valley of death, Rabinowitz finds new life for himself, for communities haunted by poverty and violence, and for the tigers he vowed to protect.

The Good Good Pig Sy Montgomery

2007-04-17 "In loving yet unsentimental prose, Sy Montgomery captures the richness that animals bring to the human experience. Sometimes it takes a too-smart-for-his-own-good pig to open our eyes to what most matters in life." —John Grogan, author of *Marley & Me: Life and Love with the World’s Worst Dog* A naturalist who spent months at a time living on her own among wild creatures in remote jungles, Sy Montgomery had always felt more comfortable with animals than with people. So she gladly opened her heart to a sick piglet who had been crowded away from nourishing meals by his stronger siblings. Yet Sy had no inkling that this piglet, later named Christopher Hogwood, would not only survive but

flourish—and she soon found herself engaged with her small-town community in ways she had never dreamed possible. Unexpectedly, Christopher provided this peripatetic traveler with something she had sought all her life: an anchor (eventually weighing 750 pounds) to family and home. The *Good Good Pig* celebrates Christopher Hogwood in all his glory, from his inauspicious infancy to hog heaven in rural New Hampshire, where his boundless zest for life and his large, loving heart made him absolute monarch over a (mostly) peaceable kingdom. At first, his domain included only Sy’s cosseted hens and her beautiful border collie, Tess. Then the neighbors began fetching Christopher home from his unauthorized jaunts, the little girls next door started giving him warm, soapy baths, and the villagers brought him delicious leftovers. His intelligence and fame increased along with his girth. He was featured in *USA Today* and on several National Public Radio environmental programs. On election day, some voters even wrote in Christopher’s name on their ballots. But as this enchanting book describes, Christopher Hogwood’s influence extended far beyond celebrity; for he was, as a friend said, a great big Buddha master. Sy reveals what she and others learned from this generous soul who just so happened to be a pig—lessons about self-acceptance, the meaning of family, the value of community, and the pleasures of the sweet green Earth. *The Good Good Pig* provides proof that with love, almost anything is possible.

Jaguar Alan Rabinowitz 1986 In 1983, zoologist Alan Rabinowitz ventured into the rain forest of Belize, determined to study the little-known jaguar in its natural habitat and to establish the world's first jaguar preserve. Within two years, he had succeeded. In *Jaguar* he provides the only first-hand account of a scientist's experience with jaguars in the wild. *Jaguar* presents an irresistible blend of natural history and adventure; intensely personal, it is a portrait of an elusive, solitary predator and the Mayas with which it shares the jungle. Strong and sensitive, the book excitingly describes the rewards and hardships of fighting to protect this almost mythical cat." - George Schaller, author of *The Last Panda and Wildlife of the Tibetan Stepp.* "The glimpse which Rabinowitz's painstaking and careful research gives us of the world of the

mysterious jaguar is tantalizing Packed with interest and adventure." - Jane Goodall, author of Reason for Hope and In the Shadow of Ma. "An intimate look at the lives of rural Central Americans. At times Rabinowitz resembles a character from Joseph Conrad ... the tension between man and beast becomes startlingly vivid." - The Washington Post. "A jungle adventure story in the classic mold, of a daredevil westerner who penetrates the deepest jungles of Belize in search of his quarry. There are thrills and chills aplenty in this quest for the mighty feline." - Kirkus Review. Originally published in 1986, this edition includes a new preface and epilogue by the author that bring the story up to date with recent events in the region and around the world.

Virgin Analicia Sotelo 2018-02-13 Selected by Ross Gay as winner of the inaugural Jake Adam York Prize, Analicia Sotelo's debut collection of poems is a vivid portrait of the artist as a young woman. In *Virgin*, Sotelo walks the line between autobiography and mythmaking, offering up identities like dishes at a feast. These poems devour and complicate tropes of femininity—of naiveté, of careless abandon—before sharply exploring the intelligence and fortitude of women, how "far & wide, / how dark & deep / this frigid female mind can go." A schoolgirl hopelessly in love. A daughter abandoned by her father. A seeming innocent in a cherry-red cardigan, lurking at the margins of a Texas barbecue. A contemporary Ariadne with her monstrous Theseus. A writer with a penchant for metaphor and a character who thwarts her own best efforts. "A Mexican American fascinator." At every step, Sotelo's poems seduce with history, folklore, and sensory detail—grilled meat, golden habañeros, and burnt sugar—before delivering clear-eyed and eviscerating insights into power, deceit, relationships, and ourselves. Here is what it means to love someone without truly understanding them. Here is what it means to be cruel. And here is what it means to become an artist, of words and of the self. Blistering and gorgeous, *Virgin* is an audacious act of imaginative self-mythology from one of our most promising young poets.

[Blood on the Forge](#) William Attaway 2005-01-31 Praised by both Richard Wright and Ralph

Ellison, this classic of Black literature is a brutal depiction of the Great Migration from the Jim Crow South This brutally gripping novel about the African-American Great Migration follows the three Moss brothers, who flee the rural South to work in industries up North. Delivered by day into the searing inferno of the steel mills, by night they encounter a world of surreal devastation, crowded with dogfighters, whores, cripples, strikers, and scabs. Keenly sensitive to character, prophetic in its depiction of environmental degradation and globalized labor, Attaway's novel is an unprecedented confrontation with the realities of American life, offering an apocalyptic vision of the melting pot not as an icon of hope but as an instrument of destruction. *Blood on the Forge* was first published in 1941, when it attracted the admiring attention of Richard Wright and Ralph Ellison. It is an indispensable account of a major turning point in black history, as well as a triumph of individual style, charged with the concentrated power and poignance of the blues.

Animal Underworld Alan Green 2006-03-07 A vast and previously undisclosed underground economy exists in the United States. The products bought and sold: animals. In *Animal Underworld*, veteran investigative journalist Alan Green exposes the sleazy, sometimes illegal web of those who trade in rare and exotic creatures. Green and The Center for Public Integrity reveal which American zoos and amusement parks dump their "surplus" animals on the middlemen adept at secretly redirecting them into the private pet trade. We're taken to exotic-animal auctions, where the anonymous high bidders are often notorious dealers, hunting-ranch proprietors, and profit-minded charlatans masquerading as conservationists. We visit some of the nation's most prestigious universities and research laboratories, whose diseased monkeys are "laundered" through this same network of breeders and dealers until they finally reach the homes of unsuspecting pet owners. And we meet the men and women who make their living by skirting through loopholes in the law, or by ignoring the law altogether. For anyone who cares about animals; for pet owners, zoo-goers, wildlife conservationists, and animal welfare advocates, *Animal Underworld* is gripping, shocking reading.

Curious about Nature Tim Burt 2020-02-20 Notwithstanding the importance of modern technology, fieldwork remains vital, not least through helping to inspire and educate the next generation. Fieldwork has the ingredients of intellectual curiosity, passion, rigour and engagement with the outdoor world - to name just a few. You may be simply noting what you see around you, making detailed records, or carrying out an experiment; all of this and much more amounts to fieldwork. Being curious, you think about the world around you, and through patient observation develop and test ideas. Forty contributors capture the excitement and importance of fieldwork through a wide variety of examples, from urban graffiti to the Great Barrier Reef. Outdoor learning is for life: people have the greatest respect and care for their world when they have first-hand experience of it.

Heart of a Lion William Stolzenburg 2016-04-12 Late one June night in 2011, a large animal collided with an SUV cruising down a Connecticut parkway. The creature appeared as something out of New England's forgotten past. Beside the road lay a 140-pound mountain lion. Speculations ran wild, the wildest of which figured him a ghostly survivor from a bygone century when lions last roamed the eastern United States. But a more fantastic scenario of facts soon unfolded. The lion was three years old, with a DNA trail embarking from the Black Hills of South Dakota on a cross-country odyssey eventually passing within thirty miles of New York City. It was the farthest landbound trek ever recorded for a wild animal in America, by a barely weaned teenager venturing solo through hostile terrain. William Stolzenburg retraces his two-year journey--from his embattled birthplace in the Black Hills, across the Great Plains and the Mississippi River, through Midwest metropolises and remote northern forests, to his tragic finale upon Connecticut's Gold Coast. Along the way, the lion traverses lands with people gunning for his kind, as well as those championing his cause. Heart of a Lion is a story of one heroic creature pitting instinct against towering odds, coming home to a society deeply divided over his return. It is a testament to the resilience of nature, and a test of humanity's willingness to live again beside the ultimate symbol of wildness.

Howl Allen Ginsberg 2006-10-10 First published in 1956, Allen Ginsberg's *Howl* is a prophetic masterpiece—an epic raging against dehumanizing society that overcame censorship trials and obscenity charges to become one of the most widely read poems of the century. This annotated version of Ginsberg's classic is the poet's own re-creation of the revolutionary work's composition process—as well as a treasure trove of anecdotes, an intimate look at the poet's writing techniques, and a veritable social history of the 1950s.

Spell of the Tiger Sy Montgomery 2009-02-15 From the author of *The Soul of an Octopus* and bestselling memoir *The Good Good Pig*, a book that earned Sy Montgomery her status as one of the most celebrated wildlife writers of our time, *Spell of the Tiger* brings readers to the Sundarbans, a vast tangle of mangrove swamp and tidal delta that lies between India and Bangladesh. It is the only spot on earth where tigers routinely eat people—swimming silently behind small boats at night to drag away fishermen, snatching honey collectors and woodcutters from the forest. But, unlike in other parts of Asia where tigers are rapidly being hunted to extinction, tigers in the Sundarbans are revered. With the skill of a naturalist and the spirit of a mystic, Montgomery reveals the delicate balance of Sundarbans life, explores the mix of worship and fear that offers tigers unique protection there, and unlocks some surprising answers about why people at risk of becoming prey might consider their predator a god.

Racecraft Barbara J. Fields 2022-02-01 A new edition of a celebrated contemporary work on race and racism Praised by a wide variety of people from Ta-Nehisi Coates to Zadie Smith, *Racecraft* “ought to be positioned,” as Bookforum put it, “at the center of any discussion of race in American life.” Most people assume racism grows from a perception of human difference: the fact of race gives rise to the practice of racism. Sociologist Karen E. Fields and historian Barbara J. Fields argue

otherwise: the practice of racism produces the illusion of race, through what they call "racecraft." And this phenomenon is intimately entwined with other forms of inequality in American life. So pervasive are the devices of racecraft in American history, economic doctrine, politics, and everyday thinking that the presence of racecraft itself goes unnoticed. That the promised post-racial age has not dawned, the authors argue, reflects the failure of Americans to develop a legitimate language for thinking about and discussing inequality. That failure should worry everyone who cares about democratic institutions.

Our Wild Calling Richard Louv 2020-11-10 "A book that offers hope." —The New York Times Book Review "A wondrous tapestry." —Carl Safina, author of *Beyond Words: What Animals Think and Feel* Audubon Medal winner Richard Louv's landmark book *Last Child in the Woods* inspired an international movement to connect children and nature. Now he redefines the future of human-animal coexistence. In *Our Wild Calling*, Louv interviews researchers, theologians, wildlife experts, indigenous healers, psychologists, and others to show how people are connecting with animals in ancient and new ways, and how this serves as an antidote to the growing epidemic of human loneliness; how dogs can teach children ethical behavior; how animal-assisted therapy may yet transform the mental health field; and what role the human-animal relationship plays in our spiritual health. He reports on wildlife relocation and on how the growing populations of wild species in urban areas are blurring the lines between domestic and wild animals. *Our Wild Calling* makes the case for protecting, promoting, and creating a sustainable and shared habitat for all creatures—not out of fear, but out of love. Includes a new interview with the author, discussion questions, and a resource guide. *Wild Things, Wild Places* Jane Alexander 2016 A

Critical Theory Today Lois Tyson 2012-09-10 *Critical Theory Today* is the essential introduction to contemporary critical theory. It provides clear, simple explanations and concrete examples of complex concepts, making a wide variety of commonly used critical theories accessible to novices without sacrificing any theoretical rigor or thoroughness. This new edition provides in-depth coverage of the most common approaches to literary analysis today: feminism, psychoanalysis, Marxism, reader-response theory, new criticism, structuralism and semiotics, deconstruction, new historicism, cultural criticism, lesbian/gay/queer theory, African American criticism, and postcolonial criticism. works for further reading.

The Life and Death of the Solid South Dewey W. Grantham 2021-10-21 Southern-style politics was one of those peculiar institutions that differentiated the South from other American regions. This system—long referred to as the Solid South—embodied a distinctive regional culture and was perpetuated through an undemocratic distribution of power and a structure based on disfranchisement, malapportioned legislatures, and one-party politics. It was the mechanism that determined who would govern in the states and localities, and in national politics it was the means through which the South's politicians defended their region's special interests and political autonomy. The history of this remarkable institution can be traced in the gradual rise, long persistence, and ultimate decline of the Democratic Party dominance in the land below the Potomac and the Ohio. This is the story that Dewey W. Grantham tells in his fresh and authoritative account of the South's modern political experience. The distillation of many years of research and reflection, is both a synthesis of the extensive literature on politics in the recent South and a challenging reinterpretation of the region's political history.

Chasing the Dragon's Tail Alan Rabinowitz 1991 A zoologist and adventurer recounts tracking leopards and exotic wildlife in Thailand's forests, describing poachers, fire ant infestations, elephant stampedes, and more Why Forests? Why Now? Frances Seymour 2016-12-27 Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. Why Forests? Why Now? synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to

decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

Mother of God Paul Rosolie 2014-05-08 Madre de Dios – 'Mother of God' – is a place where the Andean Cloud Forest intermingles with the steaming tropical jungle at the head of the Amazon river. Here can be found the greatest proliferation of living species that has ever existed on Earth, ever. And it is a place which is now under grave threat. Paul Rosolie has travelled to the very heart of this wilderness in search of rare flora and fauna. His adventures – with giant anacondas, huge cayman, the mighty jaguar and one very small anteater – are by turn thrilling, terrifying and revelatory. Paul crosses some of the world's harshest terrain and encounters some of its most extreme weather conditions. He battles with life-threatening tropical diseases and the extreme mental challenges presented by being alone in the heart of the jungle. Mother of God is an astonishing tale of adventure and survival, set in one of the world's few remaining truly wild places. It's a story of nature, red in tooth and claw, and how we must both respect its awesome power and protect its extraordinary glory.

Natural Defense Emily Monosson 2017-06-20 We rely on chemical cures to keep our bodies free from disease and our farms free from bugs and weeds. While human and agricultural health are rarely considered together, both are based on the same ecology, and both are being threatened by organisms that have evolved to resist our antibiotics and pesticides. Fortunately, scientists are finding new solutions that work with, rather than against, nature. There are viruses that bust apart bacteria; insect pheromones that throw crop-destroying moths into a misguided sexual frenzy; plant genes edited to protect against disease; and a resurgence of the ancient practice of fecal transplants. In this hopeful book, Monosson offers a fascinating look into the future of natural defenses.
